PROFILE

Final-year Information Technology student at Macquarie University with hands-on experience building software and full-stack web applications using JavaScript, TypeScript, Python, React, Next.js, and SQL-based systems. Built and deployed projects, including Syllabus Sync and a CIFAR-10 image classification application. Interested in graduate and early-career software roles where I can contribute through practical problem-solving, reliable development practices, and strong technical collaboration.

SKILLS

Languages: Python, TypeScript, JavaScript, Java, SQL, HTML/CSS

Software & Systems: REST APIs, OOP, Data Structures, Algorithms, Debugging

Frontend: React, Next.js, Tailwind CSS

Backend & Data: Node.js, PostgreSQL, Supabase, Data Handling, System Integration

Testing & DevOps: Git, GitHub Actions, Vercel, Docker, Vitest, Playwright, CI/CD

ML/AI: PyTorch, scikit-learn, Jupyter, Gradio

TECHNICAL EXPERIENCE

IT & Web Developer | SBR Group

October 2023 – December 2024

Started as a 3-month intern and was subsequently retained in a paid role

- Designed and maintained the company's WordPress website, improving mobile responsiveness and page load performance through SEO and performance optimisation.
- Automated internal workflows using Monday.com, reducing manual coordination overhead across teams.
- Collaborated with stakeholders to translate business requirements into website updates and content changes.

PROJECTS

Syllabus Sync — Student Productivity Platform

December 2025 – Present

Next.js, React, TypeScript, Tailwind CSS, Supabase, Vitest, GitHub Actions

GitHub: github.com/mrpouyaalavi/syllabus-sync | Demo: syllabus-sync-mq.vercel.app

- Co-developed a full-stack web application for Macquarie University students, implementing features for academic planning, deadlines, and campus navigation in a multi-person development environment.
- Implemented secure authentication with TOTP-based MFA, row-level security, rate limiting, and test coverage to improve system reliability and user security.
- Added accessibility and internationalisation improvements aligned with inclusive design and WCAG principles.
- Deployed the application through GitHub Actions and Vercel, applying CI/CD practices across testing, security, and release workflows.

CIFAR-10 Image Classification

April 2026 – Present

Python, PyTorch, scikit-learn, Gradio, Hugging Face Spaces, Grad-CAM

GitHub: github.com/mrpouyaalavi/CIFAR-10-Image-Classification | Demo: cifar10.pouyaalavi.dev

- Designed and implemented an end-to-end Python application to evaluate multiple deep learning architectures on the CIFAR-10 dataset, with three models deployed in a live interactive demo.
- Compared model performance under controlled conditions using measurable outcomes and improved results through structured experimentation and iteration.
- Extended the project with Grad-CAM interpretability, INT8 quantisation, command-line inference tools, and a deployed Gradio application on Hugging Face Spaces.
- Applied modern training techniques, including data augmentation, cosine annealing learning rate scheduling, and progressive unfreezing, to improve convergence and generalisation.

CUSTOMER EXPERIENCE

Sales Co-Worker | *IKEA*

May 2025 – Present

- Worked in a fast-paced team environment, supporting customers and collaborating with colleagues to resolve issues efficiently.
- Developed strong communication, teamwork, and adaptability skills through day-to-day customer-facing problem-solving.

Sales Assistant | *Zara*

December 2024 – May 2025

- Delivered customer service in a fast-paced retail environment, supporting transactions and day-to-day customer needs.
- Contributed during peak trading periods through stock handling, teamwork, and maintaining smooth store operations.

EDUCATION

Bachelor of Information Technology (AI & Web and App Development) July 2023 – November 2026

Macquarie University

- Relevant coursework: Software Engineering, Data Structures, Algorithms, Database Systems, Web Development, and AI Fundamentals.
- Volunteer, Macquarie University Buddy Program - supporting new students in their transition to university life.

Certificate IV in Information Technology (Programming)

July 2022 – July 2023

TAFE NSW

- Built hands-on foundations in HTML, CSS, JavaScript, PHP, and MySQL through practical web development projects.
- Developed responsive websites and worked with database-driven functionality, building a strong foundation for full-stack development.
